

**Claims**

1. Lubricant composition, containing lubricant oil and powder-like abrasive-like filling agent, is characterized that it additionally contains thickener and wax in the following component ratio for mass. %

Thickener	- 10 - 12
Wax	- 20 - 25
Powder-like abrasive-like filling agent	- 20 - 25
Lubricant oil	- the rest

2. Lubricant composition according to claim 1, is characterized that, as thickener, it contains solution of polyisobutylene rubber in lubricant oil in the following component ratio for mass. %

Polyisobutylene rubber	- 20-25
Lubricant oil	- the rest

3. Lubricant composition according to claim 1, is characterized that, as filling agent, it contains fine-dispersed powder of natural mineral, the dispersion ability of which does not exceed 10-30 nm.
